PROFILE

Aspiring **Full Stack Developer** with a strong foundation in JavaScript, React, Node.js, and MongoDB. Passionate about building scalable, responsive web applications and eager to contribute to innovative development teams while learning new technologies.

EDUCATION

Masai School   2025
Full Stack Web Development Program (MERN Stack)   Bangalore

Institute of Technical Education & Research   2020 – 2024
Bachelor of Technology- Computer Science & Information Technology   Bhubaneswar, India

Xavier's English High School   2019
12th CBSE   Jamshedpur

SKILLS

Technical Skills   **Soft Skills**
Frontend: HTML5, CSS3, JavaScript, React.js, Redux,   Communication, Teamwork, Adaptability
Tailwind CSS
Backend: Node.js, Firebase, MongoDB, REST APIs
Tools & Platforms: Git, GitHub, VSCode, Postman

PROJECTS

RPS Royals
Multiplayer Game
Developed a real-time multiplayer Rock-Paper-Scissors game with live chat and dynamic score tracking.
- Integrated Socket.IO and designed RESTful APIs (Express + MongoDB) to manage real-time gameplay, game rooms, moves, scores, and win logic with seamless round transitions and auto-resets.
- Deployed the frontend on Vercel and backend on Render with environment-specific configurations for smooth production readiness.
Tech Stack: React, Node.js, Express.js, MongoDB, Socket.IO, Vercel, Render

Live Site- https://rps-royals.vercel.app/ ⚲

MIT TechCart
Community Marketplace Web App
Built a dynamic web platform for MIT students to buy and sell second-hand items like textbooks and gadgets, encouraging sustainable and collaborative use of resources.
- Integrated REST APIs to fetch and display real-time product listings
- Enhanced user experience with dynamic UI and interactive features
Tech Stack: HTML, CSS, JavaScript, REST API, Vercel
GitHub- https://github.com/jasminekeshari/2409 ⚲
Live Site- https://mit-techcart.vercel.app/ ⚲

WBC
Style News Website
- Developed a responsive multi-page news website inspired by BBC's layout, featuring real-time news integration via external APIs with pagination, and a user authentication system using local storage.
- Designed a modern UI with sticky headers, mobile-friendly navigation (hamburger menu), client-side form validation, and responsive layouts using CSS Grid and Flexbox.
Tech Stack: HTML, CSS, JavaScript, REST API, Netlify
